# Newark-on-Trent masterplan

Connecting the town and its vision for growth.

Newark is one of 100 towns to be provisionally allocated up to £25 million funding from the Government's Town Fund that is aimed at bringing forward transformational economic, social, infrastructure and environmental change.

Newark's central location in England; adjacent to the A1 and A46, with two railway stations connecting its north and south, make it well connected. It also has a great deal of potential to develop an overarching transport strategy to assist with the town's overall vision for growth.

## Specifically, this work involved:

- + transport assessment/statement
- + travel plans
- + transport inputs to masterplanning
- + sustainable transport studies
