

Maidstone and Tunbridge hospitals

Kent

The Maidstone and Tunbridge Wells NHS Trust appointed mode transport planning to provide highways and transportation advice for the extension of the staff car parks at each of their two hospital sites located in Maidstone and Tunbridge Wells, Kent.

Client:

Maidstone & Tunbridge Wells NHS

Maidstone and Tunbridge hospitals

Enabling trust for parking and sustainable travel strategies.

High demand for car parking spaces at both hospitals led to errant car parking across the hospital sites. Subsequently, staff, patients and visitors struggled to get to the hospitals.

The planning application was submitted in January 2020, due to the unprecedented COVID-19 global pandemic the operations of the hospital sites evolved. Therefore, it was necessary to undertake negotiations throughout 2020 with Kent County Council and Highways England highways approval was granted in February 2021.

Specifically, this work involved:

- + transport assessment
- + travel plans
- + sustainable travel studies
- + parking studies
