# Kwaku Tano-Yeboah

Kwaku is a Chartered Civil Engineer and an elected Fellow of the Institution of Civil Engineers (ICE).

He offers extensive experience in the technical leadership and management of multi-disciplinary development infrastructure and construction projects for both public and private sector clients.

He provides expertise in highways design, drainage and wastewater management, flood risk management, and other design elements of the civil engineering discipline.

Kwaku is active with his local church and other community and social enterprises. He loves football, keeping fit, and reading.

He is driven to use his professional and personal skills and experience to transform society through leadership, innovation, and sustainability.
